# Canary Seed

## Bird Seed or Human Food?

Canary seed has often been thought of as a food for the birds, but the canary seed we offer has been approved for human consumption. It can be used in baked goods, bagels, biscuits, cookies, flours, and other mixes that are sweet or savory.

## Health Benefits:

Canary seed is one of the higher protein cereal grains grown in Canada containing about 20% protein. It contains a high percentage of unsaturated fatty acids and provides folate and iron. Being that it's gluten free, it is a great option for those with gluten intolerance and sensitivities.

Grower: Lyndon Olson Farms Inc.

Conditioner: Seed Source Inc.

Location: Archerwill, SK, Canada

Available Packaging: Tote Bag (1 MT)

25 kg Bag
